## PathFinder™ Tester

- Tests all common wiring configurations including T568A/B, 10-Base-T, TP-PMD, Token ring and USOC
- Unique "learn" mode enables tester to learn, verify and test modified configurations
- Main unit works with remote units, each with a unique electronic "address" allowing the mapping of individual circuits and routing to each cable endpoint
- LED display provides indication of cable and connection status and wiring faults including reversals, opens, shorts, miswires and split pair conditions
- Coaxial cable port identifies cable conditions including shorts, shield opens and center conductor breaks
- Built-in tone generator provides individual conductor identification and tracing

| Description | Cat. No. |
|---|---|
| PathFinder™ Tester (Main Test Unit) | 62-080 |
| PathFinder™ Tester Remote A | 62-081 |
| PathFinder™ Tester Remote B | 62-082 |
| PathFinder™ Tester Remote C | 62-083 |
| PathFinder™ Tester Remote D | 62-084 |

## PathFinder™ Tester Kits

| PathFinder™ Tester Kits | Cat. No. |
|---|---|
| PathFinder™ Tester w/Remotes A, B, C and D (blister card) | 62-085 |
| PathFinder™ Tester w/Remote A Only (blister card) | 62-086 |
