Progressive-Recip Blades

- Progressive tooth design for optimum balance of speed and cleanness of cut
- Cuts both thick and thin material
- Longer life for greater value

Progressive Metal Blade

- Fastest saw blade in metal
- For use in a broad range of materials such as sheet metal, pipes, profiles, even plastics
- Long life span

Progressive Wood Blade

- For the "finest" cuts in all wood
- Aggressive action with fine and clean splinter-free cuts
- For all thin and thick wood materials
- Plunge cutting

Progressive Universal Blade

- Most universal saw blade
- Perfect for the changing demands on building sites
- Non-ferrous metal, aluminum, plastic, nail embedded wood, metal
- Plunge cutting
- Long life span

Description	L/W/TH (Inches)	TPI	Tooth Set	Material	Blade Black	Qty.	Application	Cat. No.
Metal Blade	6 x 3/4 x .035	Prog.	Mill Set	Bi-metal	Straight	5	Metal, non-ferrous metal, sheet metal, pipes and profiles	**36-056**
Wood Blade	8 x 3/4 x .050	Prog.	Ground/Set	HCS	Taper	5	All wood and composite materials	**36-052**
Universal Blade	8 x 3/4 x .050	Prog.	Mill Set	Bi-metal	Taper	5	For wood, wood w/nails, non-ferrous metals, plastic and fiberglass	**36-076**

Portable Band Saw Blades

- Bi-metal construction
- Fit all standard portable band saw machines
- For pipe, tubing and solids
- Cut any machinable metal, including conduit, angle iron, structurals, rebar and stainless steel tubing
