

AP Video Conference Agenda

(January 9, 2001)

1) ASAC agenda discussion

(all)

2) ASAC related topics

- a) End-to-end simulation with refined model (FE distribution, interface, lower energy ...)
- b) Possible EMQ implementation (possible resonance conditions, unstable modes, non-equipartitioning condition ...)
- c) Linac space charge physics; codes bench-marking
- d) Concluding remarks on HOM damping issue (beam dynamics impact and heating concerns, tuneability and flexibility ...)
- e) Ring option study; suggestion on PCR

3) PAC2001 abstracts & talks

(All)
