

Grounding Connectors and Accessories

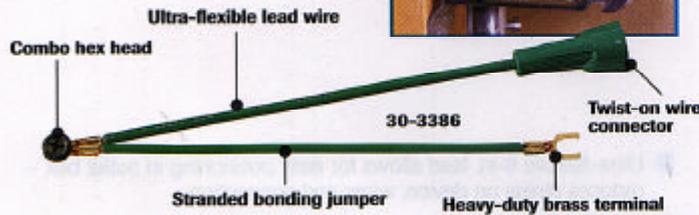

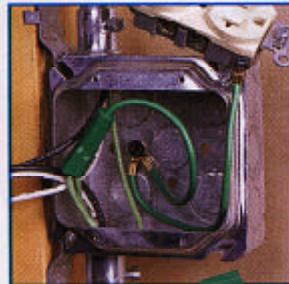

- Term-a-Nut® grounding connectors address specific requirements for grounding to steel outlet boxes and wiring multiple devices
- Solid and stranded pigtail lead wires are convenient for stranded device grounding applications
- Grounding screws offer a unique thread-forming feature, plus combination hex, phillips, and slotted head

Description	Quantity	Cat. No.
Term-a-Nut® grounding connector, #12 AWG green w/#10 fork terminal	Bag of 25	30-3180
Term-a-Nut® grounding connector, #12 AWG green w/#10 ring and ground screw	Bag of 25	30-3182
Term-a-Nut® grounding connector, #12 AWG green w/#10 ring and ground screw, #12 AWG green jumper w/#10 fork terminal	Bag of 10	30-3386
Stranded wire jumper, #12 AWG green w/#10 fork terminal, #10 ring and ground screw	Bag of 25	30-3184
Solid wire jumper, #14 AWG green w/loop and ground screw	Box of 50	30-3390
Solid wire jumper, #12 AWG green w/loop and ground screw	Box of 50	30-3392
Ground screw, thread-forming w/combo hex, phillips, slotted head	Pack of 50	30-3194

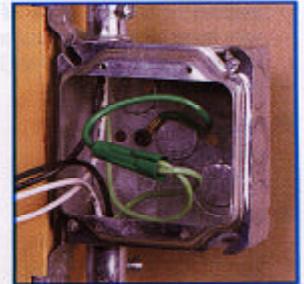

Term-a-Nut® Grounding Connector

Save time with this 3-in-1 connector. It connects grounding conductors to a device's grounding screw and connects grounding conductors to the mounting box. It also bonds the device to the box.

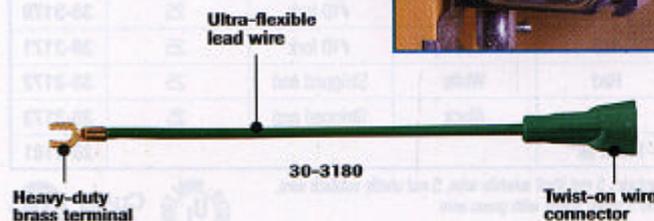

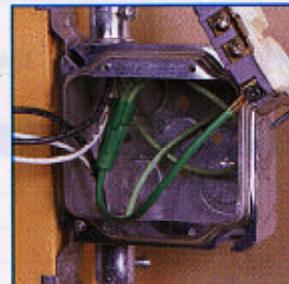

Term-a-Nut® Grounding Connector

This grounding connector is for bonding the box to the grounding conductor.

Term-a-Nut® Grounding Connector

This connector is for connecting multiple grounding conductors to a device.

Stranded Wire Jumper with Fork Terminal and Solid Wire Pigtail with Screw

This connector is for connecting the grounding screw of a device directly to the device mounting box.
